WELLORR DOCUMENT SCANNING SERVICES LTD achieves ISO 9001:2015 & 27001:2013 certification from the British Assessment Bureau

Kent based document management company has achieved certification to the internationally recognised ISO 9001:2015 & 27001:2013 standard, establishing it as one of the leaders in its field.

This independent assessment was conducted by the British Assessment Bureau, a leading Certification Body, and demonstrates WDSL's commitment to customer service and quality in delivery as well as keeping their data, staff and premises secure

WDSL has now earned the right to display the coveted British Assessment Bureau quality shield and ISO 9001:2015 & 27001:2013 logo's to demonstrate its conformance to the standard.

ISO 9001

ISO 9001 was first introduced in 1987 and requires organisations to demonstrate that they do what they say they do, and that they have a Quality Management System in place to ensure consistency and improvement; leading to high levels of performance and customer satisfaction. Certified organisations are committed to continuous improvement and are assessed to ensure progress is being maintained.

ISO 27001

ISO 27001 is the internationally recognised Information Security Management Standard that proves an organisation's commitment to the security of their customer, employee and shareholder's information. With ISO 27001 in place, WDSL are able to minimise risks to potential data security breaches and reduce errors and costs, while demonstrating credibility and trust.

WDSL's Director said, "We are over the moon to have achieved certification in the two ISO standards as they underline our commitments to our customers and our focus on quality and information security. Not many customers get to see their suppliers' 'back office' activities. This recognition demonstrates we can provide a quality solution from quotation to delivery."

The benefits of certification to ISO 9001 include:

- Streamlining an organisation's procedures;
- Bringing consistency to an organisation's service delivery;
- Reducing cost and rework;
- Improving an organisation's management practices;
- Enhanced status;
- Competitive advantage;
- Lower insurance premiums.

The benefits of certification to ISO 27001 include:

- Proving to clients an organisation keeps their information secure;
- Achieve operational excellence;
- Minimise risk of potential data security breaches;
- Protects reputation;
- Reduces errors and costs;
- Increases business profitability;
- Engage employees.
- Caring and compliant organisation and employer;
- Demonstrate health and safety credentials;
- Impress existing clients and win more new business;
- Customer reassurance;
- Improve corporate image among stakeholders;
- Cost savings from public liability premiums;
- Minimise risks of production delays.

While Wellorr Document Scanning Services Ltd has only been in existence for 3 years the company's directors have over 25 years' experience in the document management industry between them. The company has grown steadily since its formation in 2015 and is ready to move to the next level since acquiring its ISO certifications.

THE BRITISH ASSESSMENT BUREAU

The British Assessment Bureau's reputation was established in 1969 as a specialist in certification scheme management. In 1997, the Secretary of State for Trade and Industry approved the use of the word 'British' in their title, in recognition of their pre-eminent status.

Today, they certify organisations to recognised standards, including ISO 9001 (quality management), ISO 14001 (environmental management), ISO 27001 (information security management) and OHSAS 18001 (occupational health and safety management). They also design and manage bespoke assessment schemes. Such schemes are based on the establishment of standards, which can be developed to be recognised company-wide, industry-wide, nationally, or internationally.
